DETAILED ACTION

1. Claims 4-18 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits. However, it should be noted that the term "Bluetooth communication" in Claim 8 is improper. The frequency band is sufficient.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

3. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Korisch (5926139).

Regarding Claims 1-3, Korisch shows a dual band antenna having a first antenna 30 and second antenna 32 operating in separate frequency bands, formed on a common support element of a flexible dielectric film 26, all arranged as claimed.

4. The patents to Kitchener (5999132), Pankinaho (6140966), Ying (6166694) and Johnson et al (6239765) are cited as of interest showing dual band antenna elements formed on a common substrate, some which are PIFA's.
